Media4Display

DIGITAL SIGNAGE SOLUTION

With the Media4Display digital signage solution: create, manage and distribute media content on a network of screens.

Create

Import your media and create digital content. Organize and schedule it into sequences.

Manage

Manage your screens, players and other devices. Delegate all or part of broadcast management to local contributors.

Display

Display your content on your targeted devices: screens, video walls, tablets, kiosks, totems...

Main Functions

Targets

Create groups of screens based on variables using any type of criteria (location, size, format...)

Sequences

Playlist of media & multi zone content to broadcast. With options to overlay banners/logos.

Schedule

Define which sequences will be broadcast on the displays of specific players at a given point in time.

Synchronous media playback

Synchronous playback of content across multiple logical or physical screens on one or more players.

DOOH

Monetize your digital signage network thanks to Media4Display's campaign module.

Local Content Management

Broadcast management can be entirely or partially delegated to local contributors.
